

2.3.21

L.O: To solve doubling and halving problems.

1. Jenny bought two cupcakes costing 45p each. How much did she spend and what coins could she use?

2. The globe originally cost £58. It is now in the half-price sale. What would be its price now?

3. I bought a new coat for £54, my son's coat cost half the price of my coat. How much did my son's coat cost?
4. Ben found £15 behind the sofa. The next day, Chloe found double this amount. How much money did Chloe find?
5. In March, Sally saved £12. In April she saved double this amount, in May she saved double the amount she had saved in April. How much money did she save in May?
