

2.3.21

L.O: To solve doubling and halving problems.

1. Jenny bought two cupcakes costing 45p each. How much did she spend and what coins could she use?

2. An eraser costs 12p in the half-price sale. What did it cost originally?

3. The globe originally cost £58. It is now in the half-price sale. What would be its price now?

4. I bought a new coat for £46, my son's coat cost half the price of my coat. How much did my son's coat cost?
5. I had 3 pizzas from Pizza Hut, they cost £34. I had a half price discount. How much did I pay for the pizzas?
